SUMMARY

Experienced Full Stack Software Engineer with 3+ years of expertise in designing and delivering robust web applications. Demonstrated skills in implementing effective unit testing frameworks, collaborating seamlessly with cross-functional teams, and staying abreast of emerging tools and technologies.

EDUCATION

University of South Florida   Tampa, Florida

Master of Science in Computer Science   May 2025

Relevant Coursework: Data Structures, Algorithms, Cloud Computing, Data Mining, Artificial Intelligence, Machine Learning, Operating Systems

EXPERIENCE

Wipro   Hyderabad, India
Software Development Engineer   June 2019 – July 2021

- Implemented advanced JavaScript, React, Bootstrap, MVC .NET & HTML5, XHTML, CSS, client-side scripting and other application programming.
- Connected to SQL Server Databases to retrieve, update, or insert data.
- Utilized stored procedures, views, and other database components.
- Assisted senior developers with client-side development practices, standards and compliance, QA, innovation, and products.
- Solved development problems using innovative web development techniques.
- Worked collaboratively or independently on assigned tasks.

MGN Technologies   Hyderabad, India
Software Engineer Intern   May 2018 – April 2019

- Collaborated with other engineers, developers, architects, DBAs, and product managers on technical needs and issues.
- Assisted in building and maintaining reusable React components for use in applications and projects.
- Participated in code review to ensure code had acceptable performance and scalability.

PROJECTS

Todo App (React, Redux, and Framer Motion)

- This simple application allows you to manage your todos with features like adding, deleting, toggling, and editing todos.
- The app is built using React.js, state management is handled with Redux, and Framer Motion is used for simple animations.

Application Tracker (React.js, Redux, Node.js, Express.js, MongoDB)

- Application Tracker is a comprehensive web application developed using React.js, Redux, Node.js, Express.js, and MongoDB.
- The application effectively tracks and manages job applications, providing users with a centralized platform for organizing their job search process.

SKILLS

Programming	:	C, Python, Java, PHP, C++
Web	:	JavaScript, ReactJS, AngularJS, HTML, CSS, NodeJS, Express JS, Bootstrap
Databases	:	MYSQL, MongoDB, PostgresSQL
Frameworks	:	Spring, Spring Boot, Hibernate
Tools and Software	:	IntelliJ, AWS, Microsoft Office Suite, Microsoft SQL Server, Visual Studio
Other Technologies	:	GIT, SVN, AWS ,Jenkins, JIRA, Algorithms
Operating Systems	:	Windows, Linux(Ubuntu)
